1971 CENSUS OF CANADA

Bulletin préliminaire

RECENSEMENT DU CANADA 1971

URBAN AND RURAL POPULATION

Final population counts of the 1971 Census according to the "urban" and "rural" classification are presented in this bulletin. Urban and rural are classified further by size groups and farm and non-farm, respectively. Comparable figures for Canada for 1966 are shown in Table 1.

More details of the urban and rural population by characteristics such as age groups and marital status will be issued at a later date in the regular volume series of the 1971 Census.

The urban population includes all persons living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over, having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile. All the remaining population is rural.

Municipalities classed as urban under (1) and (2) above are classified by size groups according to their population. However, all municipalities (or parts) lying within the urbanized core of census metropolitan areas or other census agglomerations are allocated to the size group of the whole urbanized core.

The farm population includes all persons living in dwellings situated on a farm. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm". It therefore includes some persons who are not connected with farming operations and, conversely, excludes the farm operator who lives in the neighbouring city, town or village.

The 1971 figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. Briefly, it involves the random rounding of all last or unit digits. Since totals are independently rounded, they do not necessarily equal the sum of rounded figures in distributions. Also there may be slight differences between comparable figures in this report and those in other census bulletins. This technique will be described in the reports of the 1971 Census volume series.

POPULATION URBAINE ET RURALE

Ce bulletin présente les chiffres définitifs de population, au recensement de 1971, selon la catégorie d'habitat (urbain ou rural). La population urbaine est aussi classée selon le groupe de taille des régions urbaines et la population rurale selon qu'elle est agricole ou non agricole. Les chiffres correspondants pour le Canada en 1966 figurent au tableau 1.

De plus amples détails sur la population urbaine et la population rurale selon des caractéristiques comme le groupe d'âge et l'état matrimonial paraîtront à une date ultérieure dans la série des volumes du recensement de 1971.

La population urbaine comprend toutes les personnes demeurant dans: 1) les cités, villes et villages constitués de 1,000 habitants et plus; 2) les localités non constituées de 1,000 habitants et plus et ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) les banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Tout le reste de la population est considéré comme rural.

Les municipalités urbaines mentionnées à 1) et 2) ci-dessus sont classées selon le groupe de taille de leur population. Toutefois, toutes les municipalités (ou parties de municipalités) constituant le noyau urbanisé des régions métropolitaines de recensement ou des autres agglomérations de recensement sont classées dans le groupe de taille de l'ensemble du noyau urbanisé.

La population agricole comprend toutes les personnes vivant dans un logement situé dans une ferme. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour au moins \$50 de produits agricoles au cours de l'année précédente. Toutes les personnes demeurant dans ces exploitations dans les régions rurales sont classées dans la population "rurale agricole". La population agricole comprend donc certaines personnes qui ne travaillent pas dans l'agriculture; de même elle exclut les exploitants agricoles qui habitent une cité, une ville ou un village avoisinant.

La confidentialité des données de 1971 présentées ici est assurée par la méthode utilisée au recensement de 1971 pour interdire la possibilité d'associer des chiffres de faible importance à une personne en particulier. En un mot, cette méthode consiste à arrondir au hasard tous les derniers chiffres, c'est-à-dire les chiffres représentant les unités. Ainsi, tous les chiffres ayant été arrondis individuellement, leur somme ne donne pas nécessairement les totaux indiqués. Il peut également y avoir de légères différences entre des chiffres comparables de ce bulletin et ceux d'autres bulletins du recensement. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.
